The Ultimate Target Mover System

The Ultimate Target Mover System

WHY CT TACTICAL SYSTEMS™

The Challenge CT Tactical Systems was started in 2012 in support of top tactical training instructors looking for improved training tools. The challenges put forth were for a new system that would be quieter, smoother, more responsive and more portable than the existing solutions.

Complete Systems CT Tactical systems are built with proven state-of-the-art technology and come standard with manual and remote operation, remote speed setting technology and AC/DC operation.

Smooth, Quiet Operation Our powerful DC motors are quiet and dependable. The built in adjustable ramp-down feature keeps the target from starting and stopping abruptly and ensure smooth transitions from slow to fast and fast to slow.

Digital Transmit/Receive The transmitter is designed with state-of-the-art high speed digital technology. This makes the system extremely responsive to starts, stops and speed changes.

Set System Speeds from your Remote with "BUMP" technology
 CT Tactical Systems places speed setting at your fingertips with our "BUMP" technology. Now setting the slow and fast speeds can be done right from the remote. No need to go down range to adjust speed(s). Set slow and fast speeds with a touch of a button on your remote. Need to slow things down? **BUMP** the speed down with the "-" button. Want to speed it up? **BUMP** it up with the "+" button. Easily set slow and fast settings across full range. **BUMP** is included on all systems.

Record/Play Mode CT Tactical Elite includes a built-in memory system. It easily records and plays patterns. Up to 500 moves can be stored at one time. Buttons on the remote make record and playback simple.

AC/DC Operation All CT Tactical systems are designed to operate with either 120/240VAC or an external 12 volt source like a deep-cycle battery making it the perfect portable training device..

Upgrade Policy All systems are all based on the same proven technology. As a result, any system can be upgraded for the original difference in cost. You never lose a penny of your investment.

Warranty Total 2 year warranty includes system, remote and accessories

CT TACTICAL SYSTEMS ACCESSORIES

Guy Wire Setup
 Includes expandable end posts, pulleys, 100 ft guy wire, hand winch, 200 ft of supercord and tie down straps **\$500.00**

Tueller/Lateral Mover Setup
 Cart and end mounts only **\$500.00**

Supercord **\$0.30 per foot**

Remotes
Bump Remote (Left, Right, +, RST, -) **\$150.00**
Elite Bump remote (PLA, REC, Left, Right, +, RST, -) **200.00**

Rechargeable batteries for remote (2 pack) **\$10.00**

Battery Charger for remote **25.00**

TARGET MOVER

- Single Speed Operation
- Easily Set up Multiple Targets
- Up to 100 ft Target Area
- Set up in minutes

- Total Control from Remote
- Weatherproof NEMA 4 Steel Enclosure
- Smooth, Quiet Operation
- Includes Bump Technology

- 12VDC Operation Standard
- 120/240 VAC operation available
- Measures 8"W x 10"Hx 6"D
- Weight 24 pounds
- 2 Year Warranty

- Base system \$1795.00

TARGET MOVER II

- Dual Speed Operation
- Easily Set up Multiple Targets
- Up to 100 ft Target Area
- Set up in Minutes

- Total Control from Remote
- Weatherproof NEMA 4 Steel Enclosure
- Smooth, Quiet Operation
- Includes Bump Technology

- 12VDC Operation Standard
- 120/240 VAC operation available
- Measures 8"W x 10"Hx 6"D
- Weight 24 pounds
- 2 Year Warranty

- Base system \$2395.00

TUELLER (KNIFE) DRILL

- Single or Dual speed system
- Smooth, quiet operation
- Digital Remote control
- Weatherproof steel enclosure
- Portable and easy to set up
- Includes BUMP technology
- 120/240VAC/12VDC

In the early 1980's Dennis Tueller was conducting firearms training for the Salt Lake City police department. During one training session he was asked about the use of deadly force against someone armed with a contact weapon like a knife or club. "At what point is the person close enough that I am justified in using deadly force to stop them?"

So the class decided to see how quickly someone could attack from 7 yards. 7 yards happened to be the distance they had been using for drawing and shooting during the class. Test after test with seasoned and non-seasoned officers, young and old concluded that the best you could hope for was a tie.

It was determined that moving gave the officer a better chance of containing the situation.

This setup uses the Target Mover, Target Mover II or Target mover Elite system.

LATERAL GROUND MOVER

- Single or Dual speed system
- Smooth, quiet operation
- Digital Remote control
- Weatherproof steel enclosure
- Portable and easy to set up
- Includes BUMP technology
- 120/240VAC/12VDC

This setup uses the Target Mover, Target Mover II or Target mover Elite system and the same ground mounted track system as the Tueller Drill.

ELEVATED MOVER

- Single or Dual speed system
- Smooth, quiet operation
- Digital Remote control
- Weatherproof steel enclosure
- Portable and easy to set up
- Includes BUMP technology
- 120/240VAC/12VDC

This setup uses the Target Mover, Target Mover II or Target mover Elite system and guy wire mount system. End post protection required.

TARGET MOVER ELITE

- Dual Speed Operation
- Record/Play Scenarios
- Easily set up Multiple Targets
- Up to 100 ft Target Area

- Set up in minutes
- Total Control from Remote
- Weatherproof NEMA 4 Steel Enclosure

- Smooth, Quiet Operation
- Includes Bump Technology
- 12VDC Operation Standard
- 120/240 VAC operation available
- Measures 8"W x 10"Hx 6"D

- Weight 24 pounds
- 2 Year Warranty
- Base system \$2995.00

OUTFITTER TRAINING

- Single or Dual speed system
- Smooth, quiet operation
- Digital Remote control
- Weatherproof steel enclosure
- Portable and easy to set up
- Includes BUMP technology
- 120/240VAC/12VDC

This setup uses the Target Mover, Target Mover II or Target mover Elite system and guy wire mount system.

Posts are used 50 yards across and 100 yards from the shooting line.

SNIPER TRAINING

- Single or Dual speed system
- Smooth, quiet operation
- Digital Remote control
- Weatherproof steel enclosure
- Portable and easy to set up
- Includes BUMP technology

- 120/240VAC/12VDC

This setup uses the Target Mover, Target Mover II or Target mover Elite system and guy wire mount system set at 50 yards. System can easily be moved to 100 or 150 yards from shooting line.
